End of studies project in order to obtain the national engineer diploma in computer science

Sage X3
Sales Process Analytics and Dashboards

Presentation:

This project consists of setting up a decision-making solution for complete data analysis on the sales process of the ERP Sage X3. The project covers the entire end-to-end data manipulation chain: collection, cleaning, storage and visualization.

Objectives:

In order to meet the growing needs of customers for setting-up data-driven strategies, the company aims to enhance its current pre-sales processes by integrating new ETL technics, the OLAP layer and to cover more Sales modules and KPIs in the Data Visualization layer.
